PRODUCTION

The company owns the most updated technologically production equipment and controls every stage of its production and the quality of the products by the application of certified production systems.

LABORATORIES TESTING

Petridis S.A. guarantees photometric data sheets, according to the latest European and International recommendations and standards, thanks to the support of our photometric laboratory.

The photometric tests are performed by procedures in accordance with all European standards.

Petridis S.A., thanks to its special design computer software, is able to achieve maximum efficiency and suitable light distribution of any louvre or reflector.

PRODUCT DEVELOPMENT

For **Petridis S.A. “Good Product”** means:

/ Constant High Quality

/ High Efficiency

/ Attention to Detail

/ Value for Money

CERTIFICATES

Quality assurance

Reliable, functional and efficient products, new ideas, the continued development of design and the 55 years of experience in the lighting industry are factors of an equation that make a great pragmatism in technology resulting in high quality products.

Quality and service

An inextricable combination of a powerful advantage that gives us the strength to continue creatively in PETRIDIS Lighting, benefiting from a team of specialists, committed to satisfying customer needs in the field of illumination.

LIGHTING DESIGN

The advanced architectural solutions of our era, require the same dynamic approach and quality of lighting design, covering every ergonomic demand, efficiency and aesthetic upgrade of project. The lighting study is the coupling of art, technique and science of lighting and constitutes integral part of modern architectural design. It's the perfect combination of high quality, technological innovation and inspired design that increases the creative power of lighting, evolves his interaction in the space and the architecture and adds additional goodwill in the project while creating new experiences to people.

A team of experienced engineers, designers and lighting consultants of PETRIDIS SA collaborates daily with professionals and all of you to implement solutions in order to suit the lighting needs of each project, highlighting the uniqueness, always in accordance with international specifications and standards.

Our philosophy is summarized in the phrase:

"Humanergy Balance = Human Light + Energy Efficiency".

and is the concept of balance between the increase of well-being of people and maximum energy efficiency of a lighting project. It is achieved via an integrated lighting system that adjusts the balance of these two types with simultaneous environmental sensitivity using ecological materials and less energy-intensive light sources.

People should live and enjoy the premises, but also they should be activated by the lighting and thus improve their performance.

High performance, intelligent management of light and possibility of upgrade, mean that the investment is friendly to the environment, economical to operate and it is adapted in future altered situations.

Suitable and sufficient lighting, as defined by international standards, which highlights all the architectural features of the place and promotes the basic function.

Following the developments continuously as well as using new products, such as LED technology, the customer receives modern and innovative solutions, which provide ideal photographic results, reduced maintenance costs and power consumption as well.

PARTNERS

Our company holds strong partnerships in many countries around the world, as you can see at the map below.

This Applique combines the architectural style with the efficiency. It produces perfect lighting conditions without annoying reflections and that is why it can be used from entrance areas to offices. It escapes the restrictions of the T16 lamp by using LED lighting points that can have any spacing pitch and this gives the light line enormous flexibility.

The visual benefit: The continuous-row system is illuminated absolutely uniformly from beginning to end, is economically efficient, is maintenance-free and it has long service life.

Technical Features

- Housing from aluminium profile, painted electrostatically in selected colour.
- PMMA cover.
- Pure light without IR/UV radiation.
- Efficient thermal management.
- Operation life: 50,000 hours with efficiency > 80% of the initial luminous flux (L80B10).
- Connection for operation on 230V-50/60Hz.

Upon request:

- Available with highest colour rendering index (CRI).
- At special dimensions.

- Aluminium body, painted electrostatically in selected colour.
- PMMA cover.
- Driver 24V DC included.

98689	High Low Up /Down Applique Led 32W+32W Warm	1140	3,900
98690	High Low Up /Down Applique Led 40W+40W Warm	1420	4,700

For dimmer version add letter “D” at the end of product code.

HIGH- LOW UP/ DOWN SURFACE APPLIQUE

- Aluminium body.
- Removable plastic heads.
- High efficient diffuser in opal PMMA.
- Flow recuperator in white colour.
- CRI: min. 80 / SDCM: 3
- Luminous Efficacy:
201 Lm/Watt at 4000K 350mA
189 Lm/Watt at 3000K 350mA

Code	Description	L	Kg
98697	High Low Up /Down Surface Applique Led 16W+16W Neutral	580	3,100
98691	High Low Up /Down Surface Applique Led 24W+24W Neutral	860	3,500
98692	High Low Up /Down Surface Applique Led 32W+32W Neutral	1140	3,900
98693	High Low Up /Down Surface Applique Led 40W+40W Neutral	1420	4,700

EASYLINE APPLIQUE combines the architectural style with the efficiency. It produces perfect lighting conditions without annoying reflections and that is why it can be used from entrance areas to offices. The visual benefit: The continuous-row system is illuminated absolutely uniformly from beginning to end, is economically efficient, is maintenance-free and it has long service life.

Technical Features

- Housing from aluminium profile, painted electrostatically in selected colour.
- PMMA diffuser in opal.
- Removable plastic heads.
- Pure light without IR/UV radiation.
- Efficient thermal management.
- Up to 28W/m and 5000 Lm luminous flux range.
- Operation life: 50,000 hours with efficiency > 80% of the initial luminous flux (L80B10).
- Connection for operation on 230V/50Hz.

Upon request

- Connection for emergency lighting system, for one or three hours.
- Microprismatic or anaglyph diffuser.
- Available with higher colour rendering index (CRI).

SLOTLIGHT APPLIQUE combines the architectural style with the efficiency. It produces perfect lighting conditions without annoying reflections and that is why it can be used from entrance areas to offices.

It escapes the restrictions of the T16 lamp by using LED lighting points that can have any spacing pitch and this gives the light line enormous flexibility. The visual benefit: The continuous-row system is illuminated absolutely uniformly from beginning to end, is economically efficient, is maintenance-free and it has long service life.

Technical Features

- Housing from aluminium profile, painted electrostatically in selected colour.
- Removable plastic heads.
- High efficient diffuser in opal PMMA.
- Flow recuperator in white colour.
- Pure light without IR/UV radiation.
- Efficient thermal management.
- Operation life: 50,000 hours with efficiency > 80% of the initial luminous flux (L80B10).
- Connection for operation on 230V/50Hz.

Upon request:

- Available with highest colour rendering index (CRI).
- Connection for emergency lighting system, for one or three hours.
