PRODUCTION

The company owns the most updated technologically production equipment and controls every stage of its production and the quality of the products by the application of certified production systems.

LABORATORIES TESTING

Petridis S.A. guarantees photometric data sheets, according to the latest European and International recommendations and standards, thanks to the support of our photometric laboratory.

The photometric tests are performed by procedures in accordance with all European standards.

Petridis S.A., thanks to its special design computer software, is able to achieve maximum efficiency and suitable light distribution of any louvre or reflector.

PRODUCT DEVELOPMENT

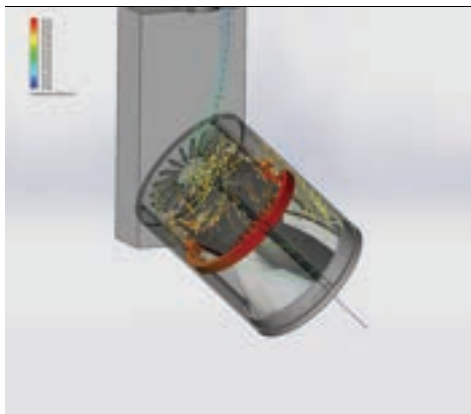

For **Petridis S.A. “Good Product”** means:

/ Constant High Quality

/ High Efficiency

/ Attention to Detail

/ Value for Money

CERTIFICATES

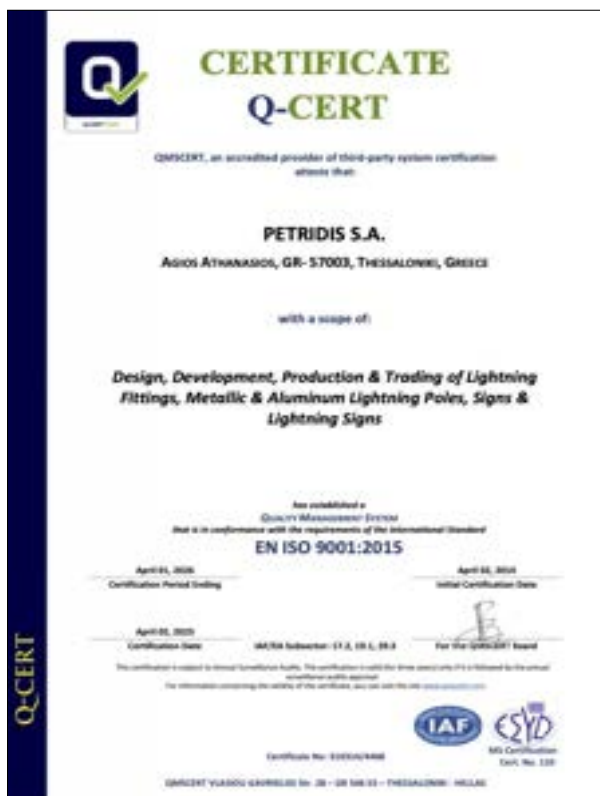

Quality assurance

Reliable, functional and efficient products, new ideas, the continued development of design and the 55 years of experience in the lighting industry are factors of an equation that make a great pragmatism in technology resulting in high quality products.

Quality and service

An inextricable combination of a powerful advantage that gives us the strength to continue creatively in PETRIDIS Lighting, benefiting from a team of specialists, committed to satisfying customer needs in the field of illumination.

LIGHTING DESIGN

The advanced architectural solutions of our era, require the same dynamic approach and quality of lighting design, covering every ergonomic demand, efficiency and aesthetic upgrade of project. The lighting study is the coupling of art, technique and science of lighting and constitutes integral part of modern architectural design. It's the perfect combination of high quality, technological innovation and inspired design that increases the creative power of lighting, evolves his interaction in the space and the architecture and adds additional goodwill in the project while creating new experiences to people.

A team of experienced engineers, designers and lighting consultants of PETRIDIS SA collaborates daily with professionals and all of you to implement solutions in order to suit the lighting needs of each project, highlighting the uniqueness, always in accordance with international specifications and standards.

Our philosophy is summarized in the phrase:

"Humanergy Balance = Human Light + Energy Efficiency".

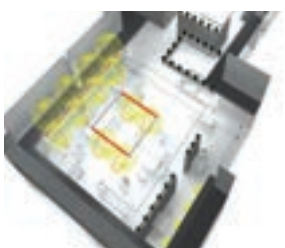

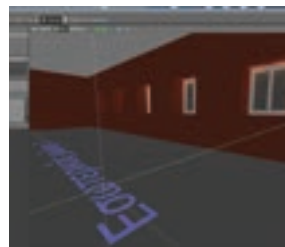

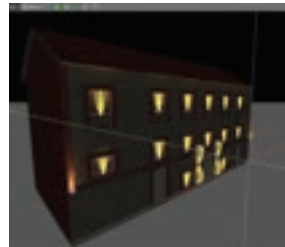

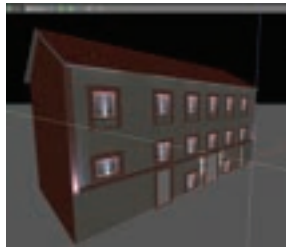

and is the concept of balance between the increase of well-being of people and maximum energy efficiency of a lighting project. It is achieved via an integrated lighting system that adjusts the balance of these two types with simultaneous environmental sensitivity using ecological materials and less energy-intensive light sources.

People should live and enjoy the premises, but also they should be activated by the lighting and thus improve their performance.

High performance, intelligent management of light and possibility of upgrade, mean that the investment is friendly to the environment, economical to operate and it is adapted in future altered situations.

Suitable and sufficient lighting, as defined by international standards, which highlights all the architectural features of the place and promotes the basic function.

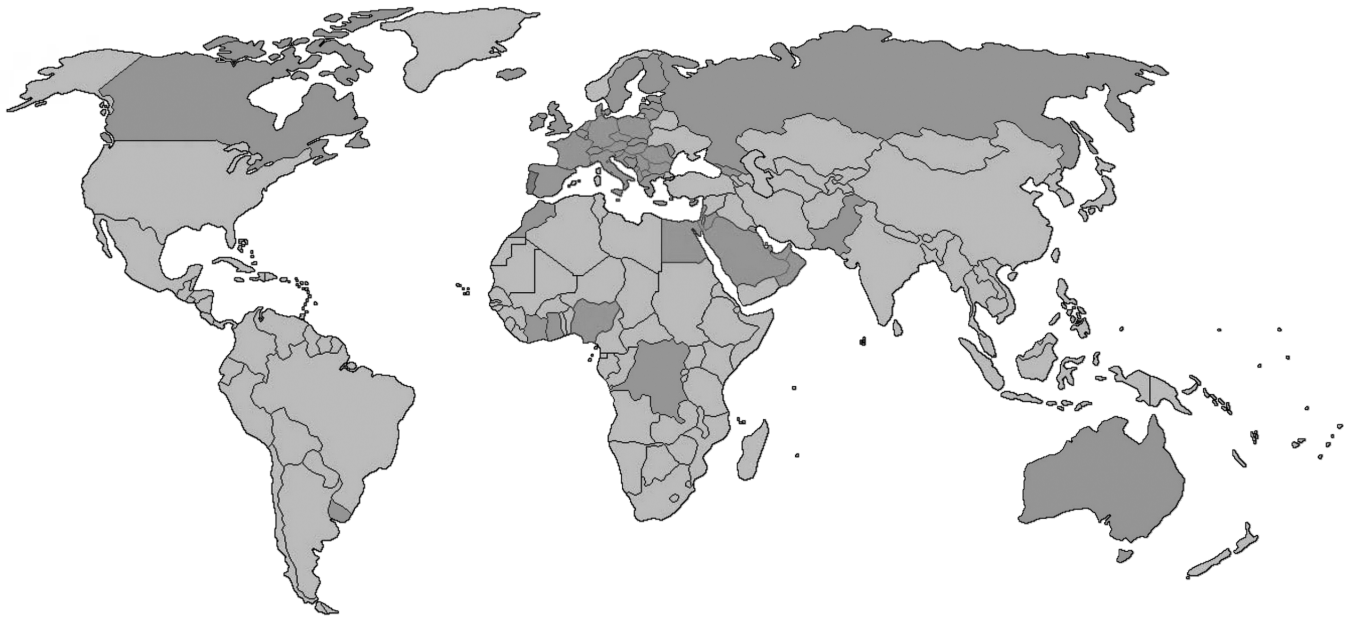

Following the developments continuously as well as using new products, such as LED technology, the customer receives modern and innovative solutions, which provide ideal photographic results, reduced maintenance costs and power consumption as well.

PARTNERS

Our company holds strong partnerships in many countries around the world, as you can see at the map below.

MORFI MINI is not just a customised product with an innovative design, but also a working tool for the lighting designers and engineers.

It combines the aesthetic with the latest LED technological standards and meets the various needs of the customers in a bespoke way: it allows them to “think big” offering totally unexpected results even to large scale projects.

Technical Features

- Aluminium body, painted electrostatically in selected colour.
- High efficient polycarbonate satin cover.
- Pure light without IR/UV radiation.
- Operation life: 50,000 hours with efficiency > 80% of the initial luminous flux (L80B10).
- Connection for operation on 230V/50Hz.

Upon Request

- At special shapes and dimensions.

MORFI MINI

MORFI MINI OUT

- Aluminium body, painted electrostatically in selected colour.
- High efficient polycarbonate satin cover.
- With transparent cable 2x0,75mm² 2,5m.
- Rosette, driver 24V DC and suspensions not included.
- CRI: min. 80 / SDCM: 3
- Luminous Efficacy:
140Lm/W at 4000 K
133Lm/W at 3000 K

MORFI MEDIUM IN LO (Low Output)

- Aluminium body, painted electrostatically in selected colour.
- High efficient polycarbonate satin cover.
- With transparent cable 2x0,75mm² 2,5m up to 80W and 4x0,75mm² 2,5m for more than 80W.
- Rosette, driver 24V DC and suspensions not included.
- CRI: min. 80 / SDCM: 3
- Luminous Efficacy:
100Lm/W at 4000 K
95Lm/W at 3000 K

MORFI WITH SPOTS

Decorative Lighting

MORFI WITH SPOTS is not just a customised product with an innovative design, but also a working tool for the lighting designers and engineers.

It combines the aesthetic with the latest LED technological standards and meets the various needs of the customers in a bespoke way: it allows them to “think big” offering totally unexpected results even to large scale projects.

Technical Features

- Aluminium body, painted electrostatically in selected colour.
- For pendant installation.
- Connection for operation on 230V/50Hz.

Upon Request

- At special shapes and dimensions.

RIM is not just a customised product with an innovative design, but also a working tool for the lighting designers and engineers. It combines the aesthetic with the latest LED technological standards and meets the various needs of the customers in a bespoke way: it allows them to “think big” offering totally unexpected results even to large scale projects.

Technical Features

- Aluminium body, painted electrostatically in selected colour.
- High efficient polycarbonate satin cover.
- Direct / Indirect illumination.
- Pure light without IR/UV radiation.
- Operation life: 50,000 hours with efficiency > 80% of the initial luminous flux (L80B10).
- Connection for operation on 230V/50Hz.

Upon Request

- At special shapes and dimensions.

MORFI is not just a customised product with an innovative design, but also a working tool for the lighting designers and engineers. It combines the aesthetic with the latest LED technological standards and meets the various needs of the customers in a bespoke way: it allows them to “think big” offering totally unexpected results even to large scale projects.

Technical Features

- Aluminium body, painted electrostatically in selected colour.
- High efficient polycarbonate satin cover.
- Direct / Indirect illumination.
- Pure light without IR/UV radiation.
- Operation life: 50,000 hours with efficiency > 80% of the initial luminous flux (L80B10).
- Connection for operation on 230V/50Hz.

Upon Request

- At special shapes and dimensions.
- Connection for operation on 230V-50/60Hz with dimmer dali or 1-10VDC ballast.

FOURO

Decorative Lighting

A luminaire with a contemporary design.
FOURO is a piece of architecture, perfect for adding stature to an area.
With it's gentle lighting, it upgrades areas such as lobbies,
corridors, offices, stores and homes.

Technical Features

- Aluminium body, painted electrostatically in selected colour.
- High efficient polycarbonate satin cover.
- Connection for operation on 230V/50Hz.
- Power supply and suspensions 2m included

Upon Request

- At special dimensions.

- Aluminium body, painted electrostatically in selected colour.
- With transparent cable 2x0,75mm² 2m.
- Rosette, driver 24V DC and suspensions 2m included.
- CRI: min. 80 / SDCM: 3
- Luminous Efficacy:
140Lm/W at 4000 K
133Lm/W at 3000 K
